AUCTION SALES

Nuuanu Valley Property
Joining
Oahu Country Club
For Sale

Under instructions from H. Cushman Carter, of Honolulu, the trustee under deed of trust made by John A. Cummins and Kahalewai Cummins to Joseph O. Carter, dated October 1, 1896, and recorded in the Hawaiian Registry of Conveyances in Liber 165, pages 183-189, I will offer for sale at public auction at my auction rooms at Fort and Queen Streets in said Honolulu, on Saturday the 17th day of May, 1913, at twelve o'clock noon, the tract of land containing an area of 12.795 acres or thereabouts known as Haipu on the Ewa side of Nuuanu Avenue, Honolulu, with a frontage on said Nuuanu Avenue of 980 feet or thereabouts and adjoining at the rear the golf links of the Oahu Country Club, and more particularly described as follows:

All that portion of the land described in Royal Patent (Grant) No. 860 to Thomas Cummins, whose metes and bounds are as follows:

Beginning at a point on the north-west side of Nuuanu Avenue by true azimuth 198° 02', 136.7 feet, from a government street monument, the coordinates of said monument referred to the Rosebank Triangulation Station being north 17885 feet and west 10.7 feet, and running by true azimuth:

1. 145° 24', 590 feet along stone wall;
2. 148° 06', 211.1 feet along stone wall and across stream;
3. 225° 30', 115.5 feet, along land Reg. Petition No. 188, Oahu Country Club, to point 45° 00', 0.3 feet from concrete monument;
4. 259° 50' 30", 164 feet, along same to point 298° 22', 19.7 feet from concrete monument;
5. 204° 47', 392.7 feet, along same to 338° 30', 0.8 feet, from concrete monument;
6. 235° 30', 194 feet, along same to point 9° 40', 1.2 feet, from concrete monument;
7. 317° 37' 30", 103.6 feet, along fence, along property of J. G. Spencer;
8. 329° 15', 265 feet, along stone wall, along same;
9. 324° 45', 142 feet, along stone wall, along same to Nuuanu Ave.;
10. 30° 55', 735.1 feet, along north-west side of Nuuanu Ave., to point of curve;
11. Southwesterly along same, following a curve to the right of 5704.6 feet radius, the direct azimuth and distance being 32° 12', 245.3 feet, to the initial point.

Containing an area of 12.795 acres. The said premises will be sold subject to an existing lease (which ex-

BAND MEMBERS
MOURN COMRADE

A report from the hospital that David Naone, assistant bandmaster, was dead when taken to his home Saturday morning, was telephoned by Bandmaster Berger to the Star-Bulletin Saturday afternoon and published, but proved inaccurate, for although taken to his home in Kawaiahae lane in a dying condition, death did not come to the veteran bandman until late in the evening. Meanwhile Capt. Berger had made the announcement of arrangements for the funeral as published in this paper.

The funeral of the aged musician took place yesterday afternoon in Kawaiahae cemetery, the casket being carried by six bandmen and lowered into the grave as the Hawaiian band played "Aloha Oe" softly. The funeral services were conducted from the home by the Rev. H. H. Parker and the burial service repeated at the grave by the Rev. Mr. Parker.

The pallbearers were Robert H. Baker, C. K. Polikapu, J. Kaana, John Amae, Zachariah Kapuli and Sam Kamakia.

Many floral tributes were sent to the grave by the friends of the bandman, who was held in high regard by all and whose faithful services with the band had helped a great deal to bring it to its present state of efficiency.

KALEIOPU IS
LAID TO REST

The funeral of the late Senator A. S. Kaleiupu, who died last Saturday, took place yesterday afternoon at two o'clock from the Catholic church, the remains being buried in Kalaikahapu cemetery. The services were largely attended and many members of the Hui OIwi were present, the pallbearers being chosen from that organization.

The death of Mr. Kaleiupu was deeply regretted in the community. He was a progressive and capable Hawaiian. Governor Frear had considered naming him on the special Hawaii probe commission had it not been for his ill-health.

ONE PLANTATION
GOES OUT OF
BUSINESSPuako in Kohala, 519 Tons,
Merged in Hind's Stock
Ranch

Puako sugar plantation on Hawaii has gone out of the count in the main industry of the territory. Its land is now being planted to sorghum for fodder for Robert Hind's cattle ranch. As Puako's crop last year was only 519 tons, there is nothing particularly serious in its discontinuance as a sugar plantation.

John C. Searle, who has managed Puako plantation, has resigned and is in town with Mrs. Searle and child. They will leave in the Sierra for a trip abroad.

John Hind having sold his interest in the little sugar plantation to his brother, Robert, the latter has added the land to his stock ranch. The mill has been dismantled, parts of the sugar-making machinery going to Hawaii but the engines being retained for the purposes of an irrigation plant for the ranch. For seven years there has been no rain to speak of on the ranch, and, while the cattle thrive on the accustomed brackish water available, the ranch people have been getting distilled water in demijohns from some distance away for household purposes.

Hind brothers bought an algaroba bean mill from C. W. Renear before he sold his rights to a corporation, and it paid for itself three times the first year. It produced enough ground algaroba beans to enable the plantation to dispense with barley for the stock. There is a prolific growth of algaroba trees in that part of Kohala, which, besides furnishing raw material for the lean mill, has made the honey business there flourishing.

An interesting fact ascertained by experience on the ranch is that the brackish water is just what suits cattle fed on algaroba meal. It contains about the right quantity of salt to make the needed laxative for the animals, without which the feed would be dangerous as a constant regimen.

ARGUMENTS OF
FOES OF TARIFF

In Saturday's issue was printed the confidential circular of F. C. Lowry, secretary and treasurer of the grocers' committee fighting sugar protection. As stated in the introduction there was other campaign matter enclosed with the circular to the trade.

Half Cent Maximum.
In the form of petition to the senate committee, the following statements and protest are made: "A rate equivalent to 20 per cent ad valorem (1.2c per pound on raw sugar of 96 test) should be the maximum on this, one of the principal articles of daily food. We protest vigorously against a higher rate. The United States is singularly favored with natural and abundant sources of supply, both of cane and beet sugar, that can be produced at a low cost. In consequence, consumers should receive refined sugar cheaper than any nation in the world; and would, if it were not for the high tariff which enhances the price."

In a bulletin, one of the enclosures, these assertions are made: "That if the tariff on sugar was removed a barrel of sugar, instead of costing the merchant on the average of about \$18, could be bought for \$11.90, or less."

"That the purchasing power of a dollar, on the average limited to 16 pounds under the present high rate, would be extended to 25 pounds under free sugar."

Says Farmer Does Not Benefit.
In the printed appeal to the trade, Mr. Lowry essays to prove to the American sugar beet grower that the tariff does not do him any good. This is what he says:

"A new development that has been placed before our legislators is the fact that in Germany, where the protection on raw sugar is 45c a hundred and on refined 52c, for the season of 1912 the farmer received an average price (according to the imperial statistics of the German empire) of \$6.07 per long ton for his sugar beets, in contrast to the average price of \$5.50 per short ton in the United States. In addition to the price the German farmer received for his sugar the factory allowed him his beet seed free of charge where the American farmer is required to pay for it, and the German farmer has returned to him 40 to 60 per cent of his beet pulp for feeding purposes, where the factories of the United States sell this by-product at a nice profit. If further evidence were needed to show that the farmer in the United States does not benefit from the high tariff on sugar, we have it here."

PIONEER DIES; HAD
LIVED HERE 40 YEARS

Frederick Wittrock, a pioneer of the territory and formerly well-known in official life, died at the home of relatives in this city last Friday night and the remains will be taken to Hana for interment by the steamer Claudine this afternoon.

Mr. Wittrock was born in Copenhagen, Denmark, sixty-five years ago and had been in the islands for forty years. He was formerly deputy sheriff of Hana district. He is survived by a widow and five children. He was prominent in Republican politics for a number of years.

"LIAR!"

That's what one of our customers told us when we showed him on "Interwoven" Sock so THIN he could read a newspaper through it, and which we told him would out wear any thick coarse heavy sock he had ever had on his feet.

"Very well," we answered, "Try this pair at our expense. If they make good come back for more. That's all we ask."

A little over a month later our friend came back and bought eleven more pairs and paid for twelve.

"I've worn those INTERWOVEN socks every day and washed them myself every night for a whole month and they're kept their shape and color without a hole. Simply marvelous for thin socks. You've got the goods on me sure enough."

Of course he didn't know what we did about the wonderful patented machines that make the interwoven socks, or he'd been more willing to believe.

Have YOU tried them?
Certainly wonderful.
All grades from 25c up.
Pure silk at 50c.

PERSONALITIES

MR. AND MRS. E. A. KNUDSEN and family, Miss Maud L'Orange, Mrs. V. Knudsen, Miss Ruth Knudsen and Miss Fisher will sail on the Kinau for Kauai May 6th.

A petition was presented to the senate by Senator Pomerene, in behalf of the city of Dayton, Ohio, declaring that the federal government was largely to blame for the recent floods in not having protected the channel of the Miami river against the encroachments of bridge piers and other obstructions.

Woman suffrage lost its fight in Florida and the issue is now dead for the next four years.
